

Environmental Benefits of JSP Polyolefin Bead Foam Products ARPAK® Expanded Polyethylene (EPE)

- ARPAK® Expanded Polyethylene (EPE) Products are produced using inert gas blowing agents. No Volatile Organic Compounds (VOC's) are employed in the production of any ARPAK® EPE Products. JSP's ARPAK® EPE is the only product in the industry produced without a VOC blowing agent.
- ARPAK® Expanded Polyethylene (EPE) Products are fully reusable and recyclable. ARPAK® EPE is labeled as a Recycling Code/Category 4  Plastic per the SPI (Society of the Plastics Industry) Recycling Standard.
- ARPAK® Expanded Polyethylene (EPE) Products may contain up to 15% recycled material. Recycled content may originate from Post-Industrial Recycled (PIR) and/or Post-Consumer Recycled (PCR) material.
- ARPAK® Expanded Polyethylene (EPE) Products are free of CFC's, HCFC's or any ozone depleting compounds.
- ARPAK® Expanded Polyethylene (EPE) Products are free of any restricted heavy metals, including Lead (Pb) or Lead Compounds, Cadmium (Cd) or Cadmium Compounds, Mercury (Hg) or Mercury Compounds, and Chromium VI (Cr-VI), or Chromium Compounds, nor do they contain any Halogenated (Brominated) Compounds.
- ARPAK® Expanded Polyethylene (EPE) Products are available in molded densities ranging from 1.3 pcf (16 g/l) to 4.6 pcf (74 g/l).
- ARPAK® Expanded Polyethylene (EPE) Products are available in standard colors which include White or Black.

Note: The above data reflects the performance of ARPLANK® products under controlled test conditions using limited material samples. There can be no assurance that similar results will be achieved in simulated tests or actual commercial use of ARPLANK® products.
